PANTONE PLUS CMYK coated & uncoated set

Pantone Accuracy and Convenience for Four-Color Printing. The new PLUS SERIES CMYK guides contain 2,868 colors, chromatically arranged for smoother transitions between colors and more intuitive selection. These guides are an ideal way to visualize, communicate and control colors for type, logos, borders, backgrounds and other graphics treatments. Compatible with today's digital workflows. Screen tint percentages are provided to enable accurate color reproduction. Printed using bio-friendly, ISO-certified inks. Text weight paper is used, to match popular print specifications. Includes color index, lighting evaluation tool and design software. Set of two guides, coated and uncoated.

Features:

- 2,886 process colors
- Chromatically arranged
- Screen tint percentages are provided
- Two-guide set on coated and uncoated stock
- Text weight paper substrates
- PANTONE COLOR MANAGER Software for updating PANTONE Colors in popular design applications
- Color locator index
- Includes ColorChecker® Lighting Indicator to aid in lighting evaluation
- Includes ColorChecker® Primer for color correcting images

Benefits:

- Accurately select, specify and communicate color for four-color process printing
- Easy location of desired colors
- Compatible with digital workflows
- Easily reproduce colors in process printing with supplied CMYK screen percentages
- Shows the effect of coated and uncoated stocks on each color
- Provides a printed standard for color comparison and quality control
- All colors are reproducible within commercially accepted printing standards
- Compatible with today's digital workflows
- Included lighting indicator tool determines if lighting conditions are suitable for accurate color selection and matching
- Included color-correction tool enables easy color balancing and creative control of digital images
